Dear Mr. Yeung:

In accordance with our proposal to provide environmentally-considered interior material recommendations for Riverside South Development Buildings C and D, please find enclosed a copy of the Task 1 Report covering carpet, painting and wall coverings.

This document contains a review of the specifications which we received on September 19, 1997 (the specifications for insulation were also received in this package). Subsequently, we have received the specifications for drywall (ceiling and wall); wood flooring; resilient flooring; and millwork (kitchen cabinets and countertops). These materials will be addressed in the next report, to complete Task 1.

Please do not hesitate to contact me with any questions or comments, at (203) 857-0200.

Sincerely,
Steven Winter Associates, Inc.
